Thank you, Sean. I'll check with Evan on the additional soil results.

Don,

Attached is the summarized assessment data for the 10/4/2018 assessment sampling conducted at FJ Doyle (wipes and paint from on-site structure and additional drainage soil samples). I've also included the Level 2 data report.

I assumed the following action levels in the summarized table.

*Wipes (PCBs) = 10 µg/100 cm²

*Paint (Pb) = 5,000 ppm (see the attached HUD document) *Soil = Site-specific COCs outlined in Action Memo

TCLP results for waste profile samples should have been sent to Evan.

Let me know if you have any questions.

Thanks,

Sean Gavlas

Good morning, gentlemen.

Our bidders for the soil and debris will need the TCLP analysis as soon as possible to prepare their bids. Additionally, any data on the wipe samples would also be appreciated.

If you have an idea on when this data is available, please apprise when you can.

Regards,

Don
